

THAT'S NOT WHAT I WANTED!!!

This function clears all data that the user has entered. Either the user has not entered all required information or the user would like to clear the data that is being stored locally.

THE END(bottom of code)

This is where the variable for the array drop down is placed as well as the `getRadioValue`, `favoriteValue` and `makeMySelect` function call. Then listed will be the variables and event listeners for the `clear`, `display` and `save Data` functions.
